

Press Release

Coding Technologies ranks highly on Deloitte's Sweden Technology Fast 50 Award list

Developer of the successful aacPlus technology ranked as number four among the fastest growing technology companies in Sweden

Stockholm, November 15th, 2006 - Coding Technologies, the leading provider of audio compression technology, has been ranked number four on the Deloitte *Sweden Technology Fast 50* list. This achievement also sees Coding Technologies qualify for the Deloitte Technology Fast 500 EMEA awards which list the 500 fastest-growing technology companies in Europe, the Middle East and Africa.

"We are very pleased that Coding Technologies has been recognized as one of the fastest growing technology businesses in Sweden, particularly as we are among so many other high-growth companies," said Lars Liljeryd, founder of Coding Technologies. "This ranking is the result of hard work, a unique product and the fact that more and more companies are now discovering the advantages of our technology."

Martin Dietz, chief executive officer and president of Coding Technologies: "This new award for Coding Technologies in Sweden mirrors the global success of our technology. Customers worldwide benefit from our solutions that enable revolutionary music services. We are thrilled about our high ranking on the Deloitte Fast 50 list as it proves we have embarked on the right strategy at the right time."

The Fast 50 Awards has become the benchmark for identifying Sweden's 50 fastest-growing technology companies through an objective ranking. The Fast 50 is presented once a year and aims to further acknowledge the success of the Swedish technology industry. Ranking includes public as well as private companies and comprises all types of technology, from internet and computers to life sciences.

Coding Technologies was awarded the Stora Teknikpriset 2006 jointly by the Swedish government agency Vinnova and the technology newspaper

Ny Teknik, as well as the Guldmusen 2006 award for best IT product of the year by Swedish business publication Veckans Affärer and the technical publication Computer Sweden. The company was also been appointed "Company of the year" at a ceremony arranged by the magazine Mobil.

The Deloitte Sweden Technology Fast 50 award ceremony took place in Stockholm, Sweden, on the 14th of November at Deloitte's office.

###

Coding Technologies

Coding Technologies provides the best audio compression for mobile, broadcasting, and Internet. SBR™ (Spectral Band Replication) from Coding Technologies is a backward and forward compatible method to enhance the efficiency of any audio codec; putting the "PRO" in mp3PRO and the "Plus" in aacPlus®. Parametric Stereo from Coding Technologies and Philips again significantly increases the efficiency of audio codecs for stereo signals at low bit rates. Products from Coding Technologies are fundamental enablers of open standards such as 3GPP, 3GPP2, MPEG, DVB, Digital Radio Mondiale, HD Radio, and the DVD Forum.

Coding Technologies is a privately held company with offices in Sweden, Germany, China, and the USA. Founded in 1997 in Stockholm, the company later merged with a spin-off of the renowned Fraunhofer Institute in Germany, the inventor of MP3. Coding Technologies' customers include America Online, EMP, iBiquity Digital, KDDI, O2, Nokia, Orange, RealNetworks, SK Telecom, Sprint, T-Mobile, Thomson, Texas Instruments, Vodafone, and XM Satellite Radio.
